# FRESHABIT LIFE IP in a nutshell

A nature project targeting freshwater habitats

In total, 12 catchment areas in 8 regions

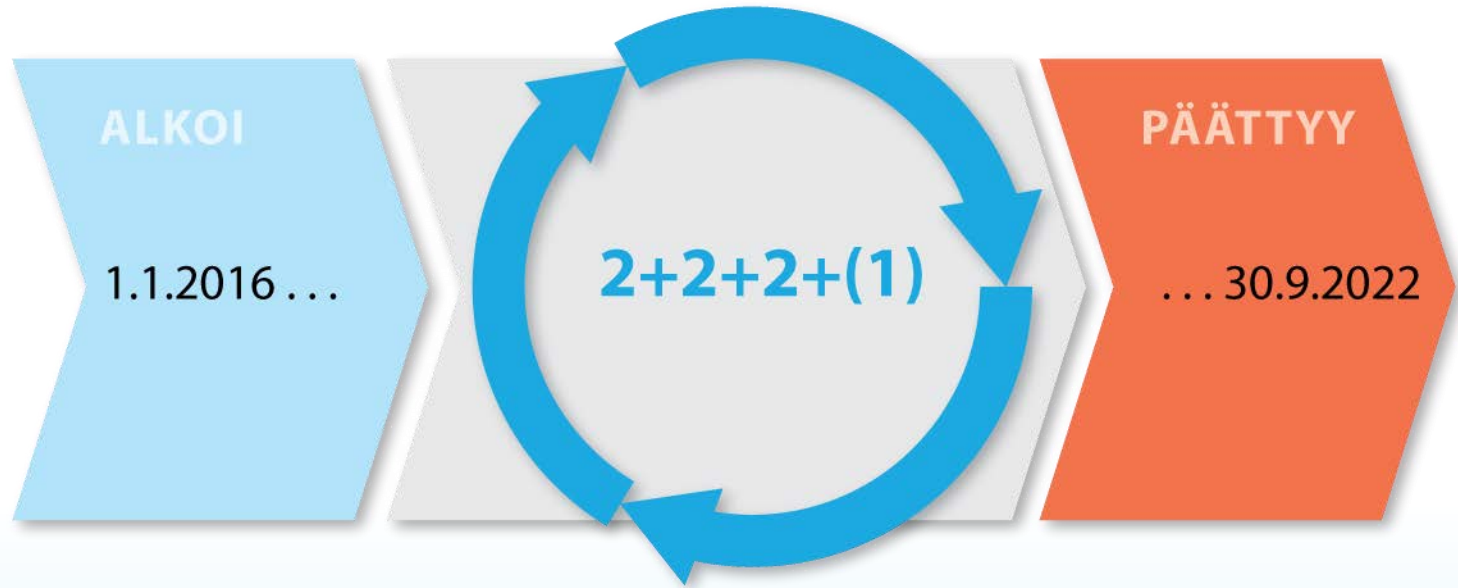

- 8 regional sub-projects with regional coordinators
- Altogether 43 N2000-sites  
~ 45 000 ha inside + 35 000 ha outside N2000

30 beneficiaries

- Each with at least one technical & financial contact person/coordinator

# First phase implemented & reported

# Experiences from phase shift & reporting

Roughly a one-year-process

- Started preparing the draft IR & amendment in ~May 2017
- Draft IR & amendment submitted by the end of Sep 2017
- Phase shift at the end of 2017
- Final IR in early April 2018
  - Some follow-up still ongoing, further actions needed after evaluation?

# Lessons learnt

- **Time resources;** reserve enough time for the process!
  - We did not have any extra time
  - Reserve also time for the persons involved > clean your schedule!
- **Staff resources;** ensure that the CB and AB's have the staff available and on top of the process
  - Applies generally to the whole administration of your IP project
- **Communicate & inform;** ensure that the AB's realize the importance of the process & associated documents
  - Stick vs. carrot

# THANK YOU!
