

Summary of the results of action C2, restoration of White-backed Woodpecker habitat

SITE NUMBER	SITE CODE	SITE NAME	Restoration of White-backed Woodpecker habitat (ha) in the GA	Restoration of White-backed Woodpecker habitat completed	Comments
5	FI0100040	Nuukio	15,0	15,0	Subsites Purola and Vuorela were restored by clearing undergrowth and harvesting timber, but there was no timber sales income for Action C2. Restoration work was outsourced.
9	FI0404001	Hiidensaari	3,9	10,1	Restoration work included clearing of undergrowth and timber harvesting, and there was some timber sales income for Action C2. Restoration work was partly outsourced and partly carried out by forestry students (Commission email 24 September 2014).
13	FI0200072	Uudenkaupungin saaristo	10,9	9,7	In Liesluoto subsite restoration work included clearing of undergrowth and was carried out by PWF's own personnel.
23	FI0500105	Uuhiniemi	3,5	3,2	Habitat restoration included clearing of undergrowth and timber harvesting, which was done by Metsähallitus forest workers. Transportation of timber was outsourced, and timber sales income was generated.
25	FI0303017	Vanajaveden lintualueet	8,0	5,4	In subsite Ikkala restoration work included clearing of undergrowth and building a fence for sheep grazing, which will help to keep the restored areas open in the future. Work was outsourced. The fence was partly build outside the boundary of the N2000 site to have access to a road; otherwise it would have been impractical to move the animals to the pasture and the costs would have been higher. The area outside the N2000 boundary is not reported in the results of Action C2. Management by sheep grazing has continued annually since 2014, when the restoration work was completed, and the farmer receives funding from Agri-Environmental Scheme for managing the site.
35	FI0500081	Haapasaari-Luhtanen-Majaluhta	14,9	14,4	Restoration of White-backed Woodpecker included clearing of undergrowth, work was outsourced.
36	FI0500108	Pyhäniemi	15,0	18,1	Restoration included clearing of undergrowth and removal of invasive alien species Himalayan balsam (<i>Impatiens glandulifera</i>).
38	FI0500017	Kyyvesi	5,6	5,6	Restoration of White-backed Woodpecker included clearing of undergrowth.
