

Workshop on Social Sustainability in Urban National Parks

Tyresta National Park

21.01.2019

Nature-based tourism is global trend that grows very fast and the main attractions in many regions are the National Parks and other natural and cultural sites. This has raised challenges in the management of ecological and socio-cultural sustainability. National Parks located close to cities have special need for new solutions in management as the number and diversity of visitors are growing fast.

In this workshop we will concentrate on Social sustainability. In the morning there will be four lecturers on the topic and in the afternoon, we will work on the topic from our own perspectives.

Welcome to the workshop in Tyresta!

Time: 21.01.2019 at 9:00-16:00

Location: The Visitor Centre of Tyresta Nationalpark

Driving directions:

Let the SL Journey Planner give you directions on how to travel to Tyresta national park and nature reserve with Stockholm Transport. The Journey Planner gives you the quickest and most convenient journey from your nearest station or bus stop.
<http://reseplanerare.sl.se/bin/help.exe/en?tpl=index>

By car from Stockholm: exit south onto route 73, (signposted Nynäshamn). After about 15 km exit right to Haninge, then turn left at the first t-junction. Go straight on over the traffic lights. In the roundabout, take the first exit to Brandbergen. Then follow the signs "Nationalpark" and you will end up in the big car park at the main entrance to Tyresta and Tyresta village.
